Eventfinity Apps - Add to Calendar

Eventfinity Live

iOS

- **Apple** | **Outlook**

Opens Apple Calendar and saves the event.
- Note: The user must close the browser or switch back to the app to resume navigation

Google

Opens app browser to Google calendar webview if not signed in, the login page appears.After login, Google Calendar prompts you to save the event.

Progressive Web Apps

iOS

- **Apple** | **Outlook**

Opens Apple Calendar and saves the event to Apple Calendar

Google

Opens the Safari View Controller (Apple's built-in web viewer that allows apps to open a webpage while maintaining Safari features) to the Google Calendar page and prompts you to save

Android

- **Apple** | **Outlook**

Prompts user to save the ICS file to the downloads folder

Google

Opens Google Calendar app and prompts user to save the event to their calendar

Note: iOS opens webview in Native and PWA views, regardless of Gmail or Google Calendar apps being on the device
